Re: Individual (unaudited) financial statements of First Investment Bank AD as at 30 June 2022 e.

Dear Sirs,

In compliance with the requirements of the Public Offering of Securities Act (POSA) and the regulations for its implementation, in our capacity as public company and issuer of bonds admitted for trading at a regulated market, we hereby submit the individual (unaudited) financial statements of First Investment Bank AD as at 30 June 2022, containing:

1. Financial statements as at 30.06.2022 as per Art. 100o, para. 4(1) of POSA;
2. Notes to the financial statements as at 30.06.2022;
3. Interim activity report under Art. 100o, para. 4(2) of POSA;
4. Declaration under Art. 100o, para. 4(3) of POSA.
5. Information pursuant to Ordinance No 2 of the Financial Supervision Commission on the prospectuses to be published when securities are offered to the public or admitted to trading on a regulated market and on disclosure of information.

Sincerely,

*(signed)*

Nikola Bakalov  
Chief Executive Officer  
Chair of the MB

**ADDENDUM TO THE UNAUDITED STAND-ALONE INTERIM FINANCIAL STATEMENTS OF  
FIRST INVESTMENT BANK AD  
AS AT 30/06/2022**

**NOTES**

**1. Basis of preparation**

**(a) Statute**

First Investment Bank AD (the Bank) was incorporated in 1993 in the Republic of Bulgaria and has its registered office in Sofia, at 37 Dragan Tzankov Blvd.

The Bank has a general banking license issued by the Bulgarian National Bank (BNB) according to which it is allowed to conduct all banking transactions permitted by Bulgarian legislation.

The Bank has foreign operations in Cyprus.

Following the successful Initial Public Offering of new shares at the Bulgarian Stock Exchange – Sofia, on June 13th 2007 the Bank was registered as a public company in the Register of the Financial Supervision Commission pursuant to the provisions of the Law on the Public Offering of Securities.

**(b) Statement of compliance**

These condensed interim financial statements were drawn up in accordance with IAS 34: Interim Financial Reporting.

**(c) Presentation**

The financial statements are presented in Bulgarian Leva (BGN) rounded to the nearest thousand.

The financial statements are prepared in accordance with the fair value principle of derivative financial instruments, financial instruments recognised at fair value in profit or loss, as well as assets recognised at fair value in other comprehensive income. Other financial assets and liabilities and non-financial assets and liabilities are stated at amortised cost or historical cost convention.

The present financial statements of the Bank are not consolidated. These individual financial statements form an integral part of the consolidated financial statements. Information about the basic earnings per share is given in the consolidated financial statements.

**(d) New standards, amendments and interpretations effective as of 01 January 2022**

There are no new standards, nor amendments to existing standards issued by the International Accounting Standards Boards effective for the current period that could have any significant impacts on the Bank's accounting policies.

**2. Significant accounting policies**

The accounting policy applied by the Bank in the preparation of these interim condensed financial statements is the same as the one applied in the preparation of the last annual financial statements for the year ended on 31 December 2021 r.

**(a) Income recognition**

**(i) Interest income**

Interest income and expense is recognised in the profit or loss as it accrues, taking into account the effective yield of the asset (liability) or an applicable floating rate. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Bank estimates future cash flows considering all contractual terms of the financial instrument but not future credit losses.

The calculation of the effective interest rate includes all fees paid or received as well as discount and premiums which are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

Interest income is calculated by applying the effective interest rate on the gross value of the financial asset, except for impaired assets for which the effective interest rate is applied to the amortised cost of the financial asset.

**(ii) Fees and Commissions**

Fee and commission income arises on financial services provided by the Bank and is recognised in profit or loss when the corresponding service is provided.

**(iii) Net trading income**

Net gains (losses) on financial assets and liabilities held for trading includes those gains and losses arising from disposals and changes in the fair value of financial assets and liabilities held for trading as well as trading income in dealing with foreign currencies and exchange differences from daily revaluation of the net open foreign currency position of the Bank.

**(iv) Dividend income**

Dividend income is recognised when the right to receive income is established. Usually this is the ex-dividend date for equity securities.

**(b) Basis of consolidation of subsidiaries**

Investments in subsidiaries are stated at cost, minus the accrued impairment.

**(c) Foreign currency transactions**

**(i) Functional and presentation currency**

The financial statements are presented in Bulgarian leva, which is the Bank's functional and presentation currency.

**(ii) Transactions and balances**

Transactions in foreign currencies are translated into the respective functional currencies of the operations at the spot exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the spot exchange rate at that date. Foreign currency differences arising on translation are difference between amortised cost in functional currency in the beginning of period, adjusted with effective interest and received payments during the period, and amortised cost in foreign currency at the spot exchange rate at the reporting date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated into the functional currency at the spot exchange rate at the date that the fair value was determined.

**(iii) Foreign operations**

The functional currency of the foreign operations in Cyprus is determined by the management to be the Euro. In determining the functional currency of the foreign operations, the Bank takes into account the fact that they are carried out as an extension of the reporting entity.

**(d) Financial assets**

**(i) Recognition**

The Bank recognizes a financial asset when it becomes a party to the contractual provisions of the instrument. The Bank initially recognizes trade and other receivables on the date of transaction. Advances to customers are recognised when cash is advanced to the borrowers. At initial recognition, the Bank measures all financial assets at fair value plus, in the case of financial asset not measured at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset.

The Bank classifies financial assets in the following categories: financial assets measured at amortized cost, financial assets measured at fair value through other comprehensive income, or financial assets measured at fair value through profit or loss. Management determines the classification of investments at initial recognition according to the business model for management of the specific class of financial assets and the contractual features of the cash flows associated with that financial asset.

**(ii) *Financial assets at amortised cost***

Debt instruments held within the Bank's business model whose objective is to hold assets in order to collect contractual cash flows and where the contractual cash flows give rise only to principal and interest payments are recognised at amortised cost. After the initial recognition assets are booked at amortised cost.

Recognition at amortised cost requires application of the effective interest rate method. The amortised cost of a financial asset is the value at which the financial asset was initially recognised, minus the principal repayments plus or minus the amortisation accrued by using the effective interest rate method for each difference between the initial value and the value at the maturity date and minus impairment.

**(iii) *Financial assets at fair value through other comprehensive income***

Debt instruments held within the Bank's business model whose objective is to hold assets in order to collect contractual cash flows or to sell the asset and where the contractual cash flows give rise only to principal and interest payments are recognised at fair value in other comprehensive income. After initial recognition, the asset is measured at fair value with changes in fair value in revaluation reserve of investments in securities (other comprehensive income). When the debt instrument is written off, the profit or loss accrued and recognised in other comprehensive income is transferred to profit or loss.

**(iv) *Financial assets at fair value through profit or loss***

The position contains two categories: financial assets held for trading and financial assets not classified in the above two categories. A financial asset is classified in this category if it was acquired for the purpose of short-term sale or if its contractual characteristics do not meet the requirement for generating payments of only principal and interest. Derivatives are also categorised as held for trading unless they are designated as hedges.

The Bank does not designate any debt instrument as at fair value through profit or loss to remove or significantly reduce an accounting mismatch.

**(v) *Capital instruments at fair value through other comprehensive income***

The Bank may make an irrevocable election to recognize changes in fair value of investments in equity instruments through other comprehensive income, not through profit or loss. A gain or loss from fair value changes will be shown in other comprehensive income and will not be reclassified subsequently to profit or loss. When the equity instrument is written off, the profit or loss accrued and recognised in other comprehensive income is directly transferred to other reserves and retained earnings.

**(vi) *Reclassification***

If the Bank reclassifies a financial asset out of the fair value through profit or loss measurement category and into the fair value through other comprehensive income measurement category, the financial asset continues to be measured at fair value. The revaluation reserve for the instrument shall be formed from changes to fair value after the reclassification date.

If the Bank reclassifies a financial asset out of the amortized cost measurement category and into the fair value through profit or loss measurement category, its fair value shall be measured at the reclassification date. Any gain or loss arising from a difference between the previous amortized cost of the financial asset and fair value is recognized in profit or loss.

If the Bank reclassifies a financial asset out of the fair value through profit or loss measurement category and into the amortized cost measurement category, its fair value at the reclassification date shall become its new gross carrying amount.

If the Bank reclassifies a financial asset out of the amortized cost measurement category and into the fair value through other comprehensive income measurement category, its fair value shall be measured at the reclassification date. Any revaluation difference shall be recognized in other comprehensive income. The effective interest rate and the measurement of expected credit losses shall not be adjusted as a result of the reclassification.

If the Bank reclassifies a financial asset from the 'measured at fair value through other comprehensive income' category to the 'measured at amortized cost' category, the entire value of the accumulated revaluation reserve at the date of reclassification is offset against the fair value of the financial asset. Thus, in practice, it turns out that at the date of reclassification the financial asset is measured as if it had always been measured at amortized cost. The effective interest rate and the measurement of expected credit losses shall not be adjusted as a result of the reclassification.

Such reclassification is only possible after a change in the business model by which financial assets are managed.

When changing from the 'hold to collect and sell' business model to the 'hold to collect' business model, the bank reclassifies the respective financial assets. To this end, it periodically reviews its business model historically and analyses the extent to which the purpose of holding financial assets meets the 'hold to collect' business model as opposed to the 'hold to collect and sell' business model. In this analysis, the following criteria may serve as indication for change in the business model: government securities with sufficiently long residual term that have not been traded since their acquisition; or privately placed securities without an active market where Fibank holds a significant part of the issue. In case of a significant predominance of the 'hold to collect' business model, the Bank needs to consider whether to reclassify the financial assets from the 'Measured at fair value through other comprehensive income' category to the 'Measured at amortized cost' category, continuing to manage financial assets in such a way as to generate cash flows only from collecting contractual payments.

If the Bank reclassifies a financial asset out of the fair value through other comprehensive income measurement category and into the fair value through profit or loss measurement category, the financial asset shall continue to be measured at fair value. The cumulative revaluation reserve at the reclassification date shall be reclassified to profit or loss.

The Bank shall not reclassify any financial liability.

**(vii) Fair value measurement principles**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Bank has access at that date. The fair value of a liability reflects its non-performance risk.

When applicable, the Bank measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

When there is no quoted price in an active market, the Bank uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all the factors that market participants would take into account in pricing a transaction.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Bank determines that the fair value at initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value at initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is supported wholly by observable market data or the transaction is closed out.

If an asset or a liability measured at fair value has a bid price and an ask price, the Bank measures assets and long positions at a bid price and liabilities and short positions at an ask price. The Bank which holds portfolios of financial assets and financial liabilities is exposed to market risk and credit risk. If the Bank manages these portfolios on the basis of its net exposure either to market risk or credit risk, the fair value is measured on the basis of a price that would be received to sell a net long position or paid to transfer a net short position for a particular risk exposure. Those portfolio-level adjustments are allocated to the individual assets and liabilities on the basis of the relative risk adjustment of each of the individual instruments in the portfolio.

The Bank recognises transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

**(viii) Derecognition**

The Bank derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or when the Bank transfers these rights in a transaction in which substantially all the risks and rewards of ownership of the financial assets are transferred to the buyer. Any interest in transferred financial assets that is created or retained by the Bank is recognised as a separate asset or liability.

The Bank derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

The Bank enters into transactions whereby it transfers financial assets recognised in its statement of financial position, but retains either all or substantially all risks and rewards of the transferred asset. If all or substantially all risks and rewards are retained, then the transferred assets are not derecognised in the statement of financial position (an example of such transactions are repo deals).

In transactions in which the Bank neither retains nor transfers substantially all the risks and rewards of ownership of a financial asset, it derecognises the asset if it does not retain control over the asset. The rights and obligations retained in the transfer are recognised separately as assets and liabilities as appropriate. In transfers in which, control over the asset is retained, the Bank continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

**(e) Cash and cash equivalents**

Cash and cash equivalents comprise cash balances on hand, cash deposited with central banks and short-term highly liquid accounts and advances to banks with original maturity of up to three months.

**(f) Investments**

Investments in debt instruments held by the Bank as part of a business model for the purpose of collecting contractual cash flows are classified as financial assets at amortised cost. Investments in debt instruments held by the Bank as part of a business model for the purpose of collecting contractual cash flows and sale are classified as financial assets at fair value in other comprehensive income. All other investments, including those whose contractual terms do not meet the requirement for generation of only principal and interest payments are classified as recognised at fair value in profit or loss.

**(g) Securities borrowing and lending business and repurchase transactions**

**(i) Securities borrowing and lending**

Investments lent under securities lending arrangements continue to be recognised in the statement of financial position and are measured in accordance with the accounting policy applicable for assets at fair value in profit or loss or at fair value in other comprehensive income. Cash collateral received in respect of securities lent is recognised as liabilities to either banks or customers. Investments borrowed under securities borrowing agreements are not recognised. Cash collateral placements in respect of securities borrowed are recognised under loans and advances to either banks or customers. Income and expenses arising from the securities borrowing and lending business are recognised on an accrual basis over the period of the transactions and are included in interest income or expense.

**(ii) Repurchase agreements**

The Bank enters into purchases (sales) of investments under agreements to resell (repurchase) substantially identical investments at a certain date in the future at a fixed price. Investments purchased subject to commitments to resell them at future dates are not recognised. The amounts paid are recognised in loans to either banks or customers. The receivables are shown as collateralised by the underlying security. Investments sold under repurchase agreements continue to be recognised in the statement of financial position and are measured in accordance with the accounting policy for either assets held for trading or available-for-sale as appropriate. The proceeds from the sale are reported as liabilities to either banks or other customers.

The difference between the purchase (sale) and resell (repurchase) considerations is recognised on an accrual basis over the period of the transaction and is included in interest income (expenses).

**(h) Borrowings**

Borrowings are recognised initially at 'cost', being their issue proceeds (fair value of consideration received) net of transaction costs incurred. Borrowings are subsequently stated at amortised cost and any difference between net proceeds and the redemption value is recognized in profit or loss over the period of the borrowings using the effective yield method. If the Bank purchases its own debt, it is removed from the statement of financial position and the difference between the carrying amount of a liability and the consideration paid is included in other operating income.

**(i) Offsetting**

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position when the Bank has a legally enforceable right to set off the recognised amounts and the transactions are intended to be settled on a net basis.

**(j) Impairment of financial assets**

The Bank recognizes 12-month expected credit loss as loss allowance when there is no significant increase in the credit risk since the initial recognition of the financial asset. When there is a significant increase in credit risk since initial recognition, expected credit losses for the whole life of the financial assets are recognized as loss allowance.

Whether credit risk is significantly increased or not is determined based on the following factors and events for the debtor or the exposure:

- Internal behavioural scoring of natural persons, companies and institutions whose exposures are above the threshold for significance;
- Decrease in credit rating (internal or external) by a given number of notches for companies and institutions whose exposures are above the threshold for significance.
- Delinquencies;
- Other factors.

**(k) Property and equipment**

Land and buildings are presented in the statement of financial position at their revalued amount which is the fair value of the asset as at the date of revaluation less any subsequent amortisation and depreciation and accumulated impairment losses. All others classes of items of property,

plant and equipment are stated in the statement of financial position at their acquisition cost less accumulated depreciation and allowance for impairment.

Depreciation is calculated on a straight-line basis at prescribed rates designed to decrease the cost or valuation of fixed assets over their expected useful lives. The annual rates of amortisation are as follows:

<b>Assets</b>	<b>%</b>
• Buildings	3 - 4
• Equipment	10 - 50
• Fixtures and fittings	10 - 15
• Motor vehicles	20
• Leasehold Improvements	2 - 50

Assets are not depreciated until they are brought into use and transferred from assets in the course of construction into the relevant asset category.

#### **(l) Intangible assets**

Intangible assets acquired by the Bank are stated at cost, less accumulated amortisation and any impairment losses.

Amortisation is calculated on a straight-line basis over the expected useful life of the asset. The annual rates of amortisation are as follows:

<b>Assets</b>	<b>%</b>
• Licenses and trademarks	10 - 14

#### **(m) Investment Property**

Investment property is property (land or a building or part of a building or both) held to earn rentals or for capital appreciation or both. The Bank has chosen for its accounting policy to account for investment property using the fair value model and applies this to all its investment property. Investment properties are initially measured at cost and are subsequently measured using the fair value model, and the revaluation income and expense is recognised in the profit for period in which they occurred. The reclassification of repossessed assets reported as inventories into investment properties is possible only where a contract to rent out the respective property has been signed. The fair value of assets constituting investment property was determined by independent property assessors holding recognised professional qualification and recent experience in assessing property with similar location and category, using reliable techniques for determining fair values.

#### **(n) Provisions**

A provision is recognised in the statement of financial position when the Bank has a legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable assessment of the amount due can be made. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

#### **(o) Acceptances**

An acceptance is created when the Bank agrees to pay, at a stipulated future date, a draft drawn on it for a specified amount. The Bank's acceptances primarily arise from documentary credits stipulating payment to be made a certain number of days after receipt of required documents. The Bank negotiates most acceptances to be settled at a later date following the reimbursement from the customers. Acceptances are accounted for as liabilities evidenced by paper.

#### **(p) Off-balance sheet commitments**

In the ordinary course of its business, the Bank enters into off-statement of financial position commitments such as guarantees and letters of credit. The Bank recognizes provision for off-statement of financial position commitments when it has a present obligation as a result of a past event, when it is probable that an outflow of resources embodying economic benefit will be required to settle the obligation, and when a reliable estimate can be made of the obligation.

**(q) Taxation**

Tax on the profit for the year comprises current tax and the change in deferred tax. Current tax comprises tax payable calculated on the basis of the expected taxable income for the year, using the tax rates enacted by the statement of financial position date, and any adjustment of tax payable for previous years.

Deferred tax is provided using the balance sheet liability method on all temporary differences between the carrying amounts for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is calculated on the basis of the tax rates that are expected to apply to the period when the asset is realised or the liability is settled. The effect on deferred tax of any changes in tax rates is charged to profit or loss, except to the extent that it relates to items previously recognised either in other comprehensive income or directly in equity.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the unused tax losses and credits can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

**(r) Critical accounting estimates and judgements in applying accounting policies**

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The actual results may differ from the Management's assumptions, estimates and judgements and in rare cases correspond fully to the preliminary result estimates.

In preparing the present individual financial statements the Management's estimates in applying the Bank's accounting policies and the main sources of uncertainty of the approximate accounting valuations do not differ from those disclosed in the individual financial statement for the previous year.

Information on the valuations and the valuation uncertainty, for which there is a significant risk of change as of 30 June 2022 are stated below and are related to the impairment of financial instruments, income tax and the following notes related to other elements of the financial statements:

- Note 4, 15 - determining of the fair value of the financial instruments, land and buildings through valuation techniques, in which the input data for the financial assets and liabilities are not based on the available market information. The Management uses valuation techniques for the fair value of financial instruments (when there is no quoted price in an active market) and non-financial assets. In applying the valuation techniques, the Management uses to a maximum degree market data and assumptions which market participants would take into account in pricing an instrument. When there is no available market data, the Management uses its best judgement of the assumptions that market participants would make. These judgements may differ from the actual prices that may be determined in a fair market transaction between informed and willing parties at the end of the reporting period.
- Notes 10, 12, 14 – measuring the expected credit loss – credit losses constitute the difference between all contractual cash flows payable to the Bank and all cash flows which the Bank expects to receive. Expected credit loss is the probability-weighted estimate of credit losses which require the Bank's judgement. Expected credit loss is discounted with the initial effective interest rate (or with the loan-adjusted effective interest rate for purchased or initially created financial assets with credit impairment).

- Notes 12, 14 – debt instruments at amortised cost – the analysis and intentions of the Management are confirmed by the business model of holding debt instruments that meet the requirements for receiving only principal and interest payments and holding assets until collecting the contractual cash flows from the bonds which are classified as debt instruments at amortised cost.
- Note 20 – Lease contract term – in determining the lease contract term the Management takes into consideration all facts and circumstances that create economic incentives for exercising the option to extend the lease, or not to exercise the option to terminate the lease. Extension options (or the periods after termination options) are included in the lease contract term only if it is reasonably certain that the lease contract has been extended (or has not been terminated).
- Note 26 – in accordance with IAS 37 — Provisions, Contingent Liabilities and Contingent Assets and the internal rules for setting aside provisions for pending court cases the bank has recognised provisions for pending court cases. The Bank is a defendant in pending cases and the outcome of those cases may lead to liabilities in an amount different from the amount of provisions recognized in the financial statement.

**(s) Assessment of repossessed assets from collaterals**

Assets accepted as collateral are recognized at the lower of the cost of acquisition and the net realizable value. When evaluating the net realizable value of the assets the Bank prepares several models for appraisal (e.g. discounted cash flows) and makes comparison to available market data (e.g. similar market transactions, offers from potential buyers).

**(t) Income taxes**

The Bank is subject to income taxes in numerous jurisdictions. Significant estimates are required in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Bank recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

**(u) Employee benefits**

*Defined contribution plans*

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Government of Bulgaria is responsible for providing pensions in Bulgaria under a defined contribution pension plan. The Bank's contributions to the defined contribution pension plan are recognised as an employee benefit expense in profit or loss in the periods during which services are rendered by employees.

*Defined benefit plans*

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Bank's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value.

The Bank has an obligation to pay certain amounts to each employee who retires with the Bank in accordance with Art. 222, § 3 of the Labour Code.

According to these regulations in the LC, when a labour contract of a bank's employee, who has acquired a pension right, is ended, the Bank is obliged to pay him compensations amounted to two gross monthly salaries. Where the employee has been with the same employer for the past 10 years, this employee is entitled to a compensation amounting to six gross monthly salaries. As at balance sheet date, the Management of the Bank estimates the approximate amount of the potential expenditures for every employee using the projected unit credit method.

For the last two years the Bank has prepared estimates for the due provisions for pensions and

has not identified significant liabilities.

#### *Termination benefits*

Termination benefits are recognised as an expense when the Bank is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognised as an expense if the Bank has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting period, then they are discounted to their present value.

#### *Short-term employee benefits*

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Bank has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably. The Bank recognises as a liability the undiscounted amount of the estimated costs related to annual leave expected to be paid in exchange for the employee's service for the period completed.

### **(v) Leases**

#### **(i) The Company as lessee**

For new contracts concluded on or after 1 January 2019 the Bank assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an asset (the identified asset) for a period of time in exchange for consideration. In order to apply this definition, the Bank assesses three key elements:

- Whether the contract refers to an identified asset which is either explicitly specified in a contract, or implicitly specified at the time that the asset is made available for use;
- The Bank has the right to obtain substantially all of the economic benefits from use of the identified asset throughout the period of use, within the scope of its right of use defined in the contract;
- The Bank has the right to direct the use of the identified asset throughout the period of use.

The Bank assesses whether it has the right to direct how and for what purpose the asset will be used throughout the period of use.

#### ***Assessment and recognition of leases by the Bank as lessee***

On the commencement date of the lease contract the Bank recognises the right-of-use asset and the lease liability in the statement of financial position. The right-of-use asset is assessed at cost which comprises the amount of the initial measurement of the lease liability, any initial direct costs incurred by the Bank, an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset at the end of the lease contract, and any lease payments made at or before the commencement date (less any lease incentives received).

The Bank depreciates the right-of-use asset using the linear method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The Bank also reviews the right-of-use assets for impairment, where such indicators exist.

On the commencement date of the lease contract the Bank measures the lease liability at the present value of the remaining lease payments at that date, discounted using the borrowing rate stipulated in the lease contract, if that rate can be readily determined, or the company's incremental borrowing rate.

As of 01.01.2019 the Bank applies IFRS 16 Leases. To this end, an analysis was made of the requirements of this Standard, and the following key elements were identified:

- IFRS 16 Leases introduces new rules for reporting lease agreements. First of all, the standard requires that an analysis be made of whether and which agreements with or without the legal form of lease constitute a lease or contain lease components in accordance with the definition of lease contained in IFRS 16, paragraph 9. According to Paragraph 9, a contract is, or contains, a lease if:
  - there is an identified asset, and
  - the contract conveys the right to control the use of the identified asset for a period of time in exchange for consideration.

In the general case, the lessee is required recognise a right-of-use asset and a lease liability at the commencement date.

Also, instead of applying the requirements for recognition of a right-of-use asset in return for consideration under a lease contract, the lessee may choose to report lease contracts as an expense under the linear method for the duration of the lease in the following types of contracts:

- ending within 12 months of the date of initial application of IFRS 16
- lease of low-value assets

In the process of assessing the effects of application of this Standard, the Bank did the following:

- - Full review of all agreements was made in order to establish whether it may be necessary to consider additional agreements as lease agreements according to the new IFRS 16 definition;
- - A decision was made for partial retrospective application (which means that the comparative information will not be changed). Under the modified approach it is possible not to assess whether existing agreements contain leases and other relief. Under the modified approach it is possible not to assess whether existing agreements contain leases and other relief.

The Management analysed the effect of application of the Standard for contracts expected to last up to five years because a big part of the rental agreements to which the Bank is a party as a tenant, the Bank can terminate after a three- or six-months' notice without owing an indemnity. Even in the other contracts this possibility is available in accordance with the law.

This reflects on the expected actual duration of the lease because the contract term depends on the probability that the Bank would exercise that option. With relation to this the Bank considers that a duration of five years is indicative of the maximum duration of the lease term, irrespective of whether contracts of longer duration exist or not.

In order to determine the incremental borrowing rate, the Bank uses an interest rate consisting of the risk-free interest rate and a surcharge reflecting the credit risk related to the Bank and additionally adjusted for the specific conditions of the lease contract, including term, country, currency, and collateral.

Lease payments included in measuring the lease liability comprise fixed payments (including in-substance fixed payments), variable lease payments that depend on an index or a rate, amounts expected to be payable by the lessee under residual value guarantees, and the exercise price of a purchase option if the Group is reasonably certain to exercise that option.

After the commencement date, the lease liability shall be decreased with the amount of payments made and shall be increased with the amount of the interest. The lease liability is remeasured to reflect any reassessment or lease modifications, or to reflect revised in-substance fixed lease payments.

When the lease liability is remeasured, the amount of the remeasurement is recognised in the right-of-use asset or in profit or loss, if the carrying amount of the right-of-use asset is already reduced to zero.

The Bank has chosen to report short-term leases and leases of low-value assets by using practical expedients envisaged in the standard. Instead of recognising right-of-use assets and

lease liabilities, the Bank recognizes the payments related to them as an expense in profit or loss using the linear method during the lease term.

In the statement of financial position, right-of-use assets are presented on a separate row "Right-of-use assets", and the liabilities under lease contracts are also presented on a separate row - "Lease liabilities".

Extension options or termination options are included in a number of the Bank's property rentals. They are used to increase the operative flexibility in the management of assets used in its operations.

**(ii) The company as lessor**

The portion of IFRS 16 which concerns the Bank as lessor no significant changes were found in comparison to the previous IAS 17. The Bank classifies a lease contract as a finance lease if it has transferred substantially all risks and rewards related to ownership of the asset subject to the lease. All other lease contracts are classified as operating.

In case of a finance lease, the Bank recognises as asset a receivable under the contract in an amount equal to the net investment in the lease. During the lease term the Bank recognizes interest income on the amount receivable at an interest rate reflecting the return rate of the net investment in the lease.

In case of operating lease, the Bank recognises lease payments as revenue on a linear basis.

As lessor, the Bank classifies each of its lease contracts as either an operating lease or a finance lease.

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

**3. Segment Reporting**

Segment information is presented in respect of the Bank's geographical segments. The primary format, geographical segments, is based on the Bank's management and internal reporting structure.

Reporting and measurement of segment assets and liabilities and segment revenues and results is based on the accounting policies set out in the accounting policy notes.

Transactions between segments are conducted on an arm's length basis.

The Bank operates principally in Bulgaria, but also has operations in Cyprus.

In presenting information on the basis of geographical segments, revenue and operating income is allocated after interbranch eliminations based on the location of the Bank branch that generated the revenue. Segment assets and liabilities are allocated after interbranch eliminations based on their geographical location.

#### 4. Financial assets and liabilities

##### Accounting classification and fair values

The Bank's accounting policy on fair value measurements is set out in Note 2(d)(vi).

The Bank measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: inputs that are quoted market prices (unadjusted) in active markets for identical instruments.

Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: inputs are observable data for a given asset or liability. This category includes all instruments where the valuation technique includes inputs not based on observable

data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Bank determines fair values using other valuation techniques.

Other valuation techniques include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist, option pricing models and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

The Bank uses widely recognised valuation models for determining the fair value of common and more simple financial instruments, like interest rate and currency swaps that use only observable market data and require little management judgement and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities, exchange traded derivatives and simple over the counter derivatives like interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgement and estimation and also reduces the uncertainty associated with determination of fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

However, where the Bank measures portfolios of financial assets and financial liabilities on the basis of net exposures, it applies judgement in determining appropriate portfolio level adjustments such as bid-ask spread.

Such adjustments are derived from observable bid-ask spreads for similar instruments and adjusted for factors specific to the portfolio.

For more complex instruments, the Bank uses proprietary valuation models, which usually are developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Example of instruments involving significant unobservable inputs include certain over the counter derivatives, certain loans and securities for which there is no active market and retained interests in securitisations. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of probability of counterparty default and prepayments and selection of appropriate discount rates.

The Bank has an established control framework with respect to the measurement of fair values. This framework includes a Risk Management function, which is independent of Treasury division and reports to management, and which has overall responsibility for independently verifying the results of trading and investment operations and all significant fair value measurements. Specific controls include:

- verification of observable pricing;
- proposal of new models and changes to existing models is made by the Risk Analysis and Control Division and approved by the Management Board;
- calibration of models against observed market transactions;

- analysis and investigation of significant daily valuation movements;
- review of significant unobservable inputs, valuation adjustments and significant changes to the fair value measurement of Level 3 instruments compared to previous month, by Risk Analysis and Control division.

Where third-party information, such as broker quotes or pricing services, are used to measure fair value, Risk Management division assesses and documents the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS. This includes:

- verifying that the broker or pricing service is approved by the Bank for use in pricing the relevant type of financial instrument;
- understanding how the fair value has been arrived at and the extent to which it represents actual market transactions;
- when prices for similar instruments are used to measure fair value, how these prices have been adjusted to reflect the characteristics of the instrument subject to measurement;
- where a number of quotes for the same financial instrument have been obtained, how fair value has been determined using those quotes.

The tables below set out analysis of financial instruments measured at fair value at the end of the reporting period classified by fair value hierarchy level framework categorising fair value measurement. The amounts are based on the amounts in the statement of financial position.

Other payables	12,230	4,662
<b>Total</b>	<b>15,201</b>	<b>7,817</b>

## 27. Shareholders

The subscription for the public offering of shares of First Investment Bank AD was completed successfully on 3 July 2020. Out of the 40 000 000 ordinary dematerialized shares with nominal value of BGN 1, and issue value of BGN 5.00 each, a total of 39 084 800 shares were subscribed and paid up.

On 31 July 2020 First Investment Bank's capital increase was registered in the Commercial Register and Register of Non-for-profit Legal Entities. This registration was carried out after the subscription for shares was successfully completed on 03 July 2020 based on the prospectus confirmed by the Financial Supervision Commission.

Thus, the Bank's capital was increased to BGN 149 084 800 by issue of 39 084 800 new ordinary, registered, dematerialized shares, each with one voting right in the general meeting, with nominal value of BGN 1 and issue value of BGN 5. The amount of the capital after the increase was reflected in the By-Laws of First Investment Bank AD after approval granted by the Bulgarian National Bank.

The table below shows those shareholders of the Bank holding shares as at 30/06/2022 together with the number and percentage of total issued shares.

	<b>Number of shares</b>	<b>% of issued share capital</b>
Mr. Ivailo Dimitrov Mutafchiev	46,750,000	31.36
Mr. Tzeko Todorov Minev	46,750,000	31.36
Bulgarian Bank for Development AD	27,350,000	18.35

**INTERIM REPORT  
ON THE ACTIVITY OF FIRST INVESTMENT BANK AD  
as at 30 June 2022**

**(individual)**

**prepared under Art. 100o, para. 4(2) and with relation to Art. 100o<sup>1</sup>, para. 7 of the  
Public Offering of Securities Act (POSA)**

In the first half of 2022 First Investment Bank AD (First Investment Bank AD, the Bank) continued its successful development as an innovative, stable and reliable bank institution.

Highlights in the activity of First Investment Bank AD as at 30 June 2022:

1. Notification pursuant to Art. 100y, Para. 1(2) with relation to Para.2 of the Law on the Public Offering of Securities (LPOS) regarding publication in the Commercial Register and Register of NPLE of changes in the Managing Board of First Investment Bank AD was published on 24 January 2022;
2. The individual (unaudited) financial statements of First Investment Bank AD as at 31 December 2021 were published on 31 January 2022;
3. The consolidated (unaudited) financial statements of First Investment Bank AD as at 31 Dec 2021 were published on 01 March 2022;
4. The annual individual (audited) financial statements of First Investment Bank AD as at 31 December 2021 were published on 31 March 2022;
5. The annual consolidated (audited) financial statements of First Investment Bank AD as at 31 December 2021 were published on 29 April 2022;
6. The unconsolidated (unaudited) financial statements of First Investment Bank AD as at 31 March 2022 were published on 29 April 2022;
7. On 03 May 2022 First Investment Bank AD disclosed information pursuant to successful issue of the third tranche from Fibank's programme for issue of perpetual, non-cumulative, uncollateralized, deeply subordinated, non-convertible bonds which meet the requirements for additional Tier 1 capital within the meaning of Art. 52 of Regulation (EU) No. 575/2013, with a total amount of up to EUR 100 million
8. Notice and materials for the General Meeting of Shareholders of First Investment Bank AD were published on 12 May 2022;
9. Consolidated (unaudited) financial statements of First Investment Bank AD as at 31 March 2022 were published on 30 May 2022;
10. Information on the results from the regular Annual General Meeting of Shareholders of First Investment Bank held on 16 June 2022 was published on that same day;
11. The minutes of the regular annual General Meeting of Shareholders of First Investment Bank AD held on 16 June 2022 were published on 20 June 2022;

*Review of the activities of First Investment Bank AD as at 30 June 2022 on individual (unaudited) basis*

- *Balance sheet as at 30 June 2022.*

The balance sheet assets of the Bank as at 30.06.2022 reached BGN 11,817 million, showing an increase by BGN 549 million against the end of 2021. In terms of assets First Investment Bank AD retains its place among the leading banks in the Bulgarian banking system. As at 30.06.2022 the deposits from other customers amounted to BGN 9,925 million, with net increase of BGN 500 million for the period; as regards this indicator the Bank also retains its position as one of the leading banks in Bulgaria. As at the end of June 2022 the accounting equity amounted to BGN 1,283 million net, which means an increase by BGN 14 million for the period. Receivables from clients at 30 June 2022 amounted to BGN 6,224 million book value, a decrease against the end of 2021 by BGN 92 million.

- *Individual profit as at 30 June 2022*

Despite the Covid-19 pandemic which started at the beginning of 2020 and led to a drop in financial activities globally, the Bank has improved its key financial indicators, and reports an increase of BGN 3,162 thousand of the net profit as at 30 June 2022 compared to the same period of 2021, reaching BGN 30,758 thousand. To a great extent this is due to the higher income from banking operations.

The profit before tax for H1 2022 was BGN 34,377 thousand, the profit before provisions and impairment amounted to BGN 89,389 thousand.

The total revenue from banking operations as at 30 June 2022 amounted to BGN 208,986 thousand (2021: BGN 184,749 thousand). The net interest income for the period January-June 2022 amounted to BGN 127,624 thousand, marking an increase by BGN 7,627 thousand compared the same period of the previous year. The main reason for this is the decrease in interest rates on attracted funds leading to lower interest expense. In H1 2022 the net fee and commission income amounted to BGN 65,378 thousand, BGN 12,835 thousand higher than the same period in 2021.

- *Capital resources*

The capital adequacy ratio of First Investment Bank AD as at 30 June 2022 reached 22.28 %. The Tier 1 capital ratio was also 22.28%, while CET1 ratio was 18.62 %. The own funds amounted to BGN 1,545 million. As at 30 June 2022 the Bank was in compliance with and above the regulatory capital requirements.

- *Liquidity*

The liquidity coverage ratio of First Investment Bank AD as at 30 June 2022 reached 238.11 % and the net stable funding ratio was 142.79 %, showing a stable liquidity position.

- *A total of 125 branches and offices throughout the country*

As at 31 March 2022, First Investment Bank AD had a total of 125 branches and offices in Bulgaria – 42 of them in Sofia and 83 in towns throughout the country. The number of outlets reflects the adherence to a policy of synergy and maintaining optimum efficiency in the branch network of the Bank.

**Appendix 1**

**INFORMATION AS AT 30 June 2022  
UNDER ART. 12, PARA. 1, P. 4  
OF ORDINANCE No 2**

*of the Financial Supervision on the initial and subsequent disclosure of information in the public offering of securities and the admission of securities for trading at a regulated market*

- a) information on changes in the accounting policy during the reporting period, the reasons for them, and the way in which they affect the financial results and equity of the issuer

*There are no new standards, nor amendments to existing standards issued by the International Accounting Standards Boards effective for the current period that could have any significant impacts on the Bank's accounting policies.*

*The accounting policy applied by the Bank in the preparation of these interim condensed financial statements is the same as the one applied in the preparation of the last annual financial statements for the year ended on 31 December 2021.*

- b) information on changes in the economic group of the issuer, if applicable:

*As at 30 June 2022 the following changes in the Bank's economic group had occurred:*

- The General Meeting of Shareholders of Diners Club Bulgaria decided to increase the company's share capital from BGN 610 000 to BGN 910 000 through the issue of 300 000 new registered available voting shares, with nominal and issue value of BGN 1 each, which are to be subscribed by the shareholder First Investment Bank AD. The GMS also approved amendments to Articles 6.1 and чл.6.2 of the By-Laws of Diners Club Bulgaria AD, provided that the shares issued for the increase are subscribed and paid up. This change will be published in the Commercial Register and RNPLE;*
- The General Meeting of Shareholders of "Medical Centres Fi Health Plovdiv" AD decided to re-elect the current members of the Board of Directors Alexander Hristov Alexandrov, Kostadinka Ignatova Petleshkova and Tsvetomira Marinova Karapchanska for a new three-year term in office. This change will be published in the Commercial Register and RNPLE;*
- Balkan Financial Services EAD, in liquidation – a notice to the company's creditors was published under #20220511092220 in the Commercial Register and RNPLE. Thus, the six-month period of liquidation as per the sole owner's decision has begun.*

- c) information on the outcome from organizational changes within the issuer, such as restructuring, sale of companies from the economic group, in-kind contributions by the company, renting of property, long-term investments, suspension of operations:

*See „b” above.*

- d) opinion of the managing body regarding the feasibility of the forecasts published for the current financial year, taking into account the results of the current quarter, as well as information about the factors and circumstances that will affect the achievement of the forecast results at least for the next quarter:

*Based on these interim quarterly reports the management considers that the possibilities for achieving the forecasts regarding key ratios, as stated in the “Priorities for Development 2021-2023” remain.*

- e) information on the persons holding directly or indirectly at least 5 per cent of votes in the General Meeting at the end of the respective quarter, and changes in the votes held by such persons since the end of the previous quarter:

	<i>at 31 March 2022</i>		<i>at 30 June 2022</i>	
	<i>Number of shares</i>	<i>% of capital</i>	<i>Number of shares</i>	<i>% of capital</i>
Mr Tseko Minev	46 750 000	31,36%	No change	
Mr Ivaylo Mutafchiev	46 750 000	31,36%	No change	
Bulgarian Development Bank AD	27 350 000	18,35%	No change	
Valea Foundation	11 734 800	7,87%	No change	

- f) information about the shares held by the management and supervisory bodies of the issuer at the end of the respective quarter, as well as on the changes which have occurred since the end of the preceding quarter for each person:

<i>Members of the Managing Board</i>	<i>at 31 March 2022</i>		<i>at 30 June 2022</i>	
	<i>Number of shares</i>	<i>% of capital</i>	<i>Number of shares</i>	<i>% of capital</i>
Nikola Bakalov	374	0,00	No change	
Chavdar Zlatev	27 173	0,01	No change	
Ralitsa Bogoeva	0	0,00	No change	
Svetozar Popov	5856	0,00	No change	
Ianko Karakolev	12	0,00	No change	
Nadia Koshinska	234	0,00	No change	

<i>Members of the Supervisory Board</i>	<i>at 31 March 2022</i>		<i>at 30 June 2022</i>	
	<i>Number of shares</i>	<i>% of capital</i>	<i>Number of shares</i>	<i>% of capital</i>
Evgeni Lukanov	337 139	0,23	No change	
Maya Georgieva	11 388	0,01	No change	
Jordan Skortchev	19 125	0,01	No change	
Radka Mineva	-	0,00	No change	
Jyrki Koskelo	-	0,00	No change	

- g) Information about pending judicial, administrative or arbitration procedures concerning liabilities or receivables amounting to at least 10 per cent of the equity of the issuer; if the total amount of liabilities or receivables of the issuer in all initiated procedures exceeds 10 per cent of its equity, information shall be presented for each procedure separately:

*No events have occurred.*

- h) information about loans granted by the issuer or any of its subsidiaries, guarantees provided or liabilities assumed to a single entity or its subsidiary, including related parties, indicating the nature of relations between the issuer and the entity, outstanding principal amount, interest rate, maturity date, initial amount of the liability, term and conditions:

*First Investment Bank AD is a public company part of whose main activity is the public attraction of deposits or other repayable funds and granting of loans or other financing. In this sense, for the period until 30 June 2022 no events have occurred beyond the ordinary activity of the Bank*

**Appendix 2**

**INFORMATION AS AT 30 June 2022  
UNDER ART. 12, PARA. 3  
OF ORDINANCE No. 2**

*of the Financial Supervision on the initial and subsequent disclosure of information in the public offering of securities and the admission of securities for trading at a regulated market*

*1. Transactions between related parties concluded during the reporting period of the current financial year that had significant effect on the financial position or performance of the company in this period:*

First Investment Bank AD enters into transactions with related parties in the ordinary course of its banking business, on terms which would be customary in transactions with unrelated parties. The information on these transactions has been disclosed in Note 29 to the unaudited individual interim financial report.

*2. Changes in transactions concluded with related parties disclosed in the annual report that have significant impact on the financial position or performance of the company during the reporting period of the current financial year.*

The information on these transactions has been disclosed in Note 29 to the unaudited individual interim financial report.
